Summary

Master's student in Digital Learning Games at Tallinn University with experience building user-facing web interfaces using JavaScript and other web technologies. Interested in user-facing web development roles, with ongoing exploration of game engines, Blender, React, and Three.js alongside academic studies.

Experience

- **Advanced App Engineering Specialist @Accenture** - 06-2020/09-2025 (5 years) - Makati, Philippines: Resolved critical production issues on AEM (Adobe Experience Manager) e-commerce sites impacting customer journey, sales, and frontend performance. Collaborated with L2 support and technical architects to develop workarounds and hotfixes. Utilized AEM, JavaScript, CSS, HTML templating, and AEM's Java Content Repository (JCR) to implement solutions. Developed reusable and authorable web components, conducted thorough testing, and provided client demonstrations.
- **Front-end Developer @Alprops Management Inc.** - 06-2018/05-2020 (2 years) - Makati, Philippines: Designed and developed user-friendly front-end experiences for websites, a mobile app, and web applications. Created social media graphics, marketing materials, and instructional videos to support company's branding. Used Framework7, jQuery, JavaScript, and CSS for development, along with Adobe Photoshop, Illustrator, and Sony Vegas Pro for design and video production.
- **Web and Graphics Designer @Naotech Inc.** - 03-2015/05-2018 (3 years, 3 months) - Makati, Philippines: Designed and developed web interfaces for both internal and client projects. Designed graphics for social media, advertisements, and marketing campaigns. Worked closely with teams to align branding. Utilized Framework7, jQuery, JavaScript, and CSS for development, alongside Adobe Photoshop and Illustrator for graphic design.
- **Web and Graphic Designer @DSI Technology** - 09-2014/03-2015 (7 months) - BGC, Philippines: Designed and implemented company websites using WordPress and Joomla. Created graphics for email marketing campaigns, advertisements, and newsletters. Developed posters and other marketing materials using Adobe Photoshop.

Open-Source/Hobby projects

- Collaborative project: An IoT device manager for home automation. (WIP) [@IoT-device-manager](#)
